BIOMÉRIEUX: INNOVATIVE DIAGNOSTIC SOLUTIONS

A world leader in the field of *in vitro* diagnostics for over 50 years, bioMérieux is present in more than 150 countries through 42 subsidiaries and a large network of distributors.

bioMérieux provides diagnostic solutions (reagents, instruments and software) that determine the source of disease or contamination to improve patient health and ensure consumer safety.

Its products are mainly used for diagnosing infectious diseases. They are also used for detecting microorganisms in agri-food, pharmaceutical and cosmetic products.

bioMérieux is a pioneer in the field of *in vitro* diagnostics and leader in clinical microbiology and in industrial microbiological control. Through our commitment to serve our customers, we contribute to the quality of patient care and the safety of consumers across the globe.

PRODUCT QUALITY AND SAFETY

Each day, across the globe, the quality of our diagnostic tests determines the treatment prescribed by a healthcare professional or the marketing of a food product.

In vitro diagnostics plays an essential role in public health: it is our responsibility to help customers do their jobs well by understanding their needs and by delivering results that will enable physicians to make treatment decisions. Our Quality Policy is central to achieving this.

New companies, new subsidiaries, new products: the scope of our growth and the complexity of our activity in an extremely regulated environment require us to move extremely quickly while complying with the most demanding standards, everywhere in the world.

Our Quality Policy

bioMérieux's Quality Policy guides our internal processes and allows us to enhance our performance and be more effective. In line with regulatory requirements, it draws upon input from the company's sites and subsidiaries worldwide to ensure that the approach is understood and embraced by all our employees.

This policy helps us to:

- enhance public health worldwide,
- understand and meet our customers' needs,
- share goals and responsibilities with all employees,
- improve our processes and our performance.

When it comes to our Quality Policy, we adopt a holistic approach: our goal is to integrate Quality into every aspect of our work.

We have established a Global Quality Management System to oversee our processes and manage risk. This approach helps ensure compliance with regulatory requirements. In addition, it reduces our production cycle times, limits product nonconformities and results in an optimized supply chain to satisfy the needs of our customers.

Quality is everybody's responsibility

Quality is not up to the Quality Organization alone: it is a responsibility shared by all employees. Continuous improvement initiatives are in place and our teams share their best practices worldwide.

CORPORATE RESPONSIBILITY

bioMérieux's responsibility as a corporate citizen is very closely tied to its historical commitment and its pioneering role in the fight against infectious diseases. Each day, the quality of our diagnostic tests makes it possible for patients to receive care under the best conditions while we help protect consumers' health by ensuring the microbiological quality of food and bio-pharmaceutical products.

Being committed to serve global public health creates specific responsibilities that bioMérieux embraces across its areas of expertise, with a triple focus:

Responsibility to Society

Promote access to diagnostics through our commitment to address global public health challenges

Support for the Mérieux Foundations: €1.798 million

Launch of a program to improve maternal and infant health in Africa.

Responsibility to the Workforce

Create the best working environment

Women represent nearly 48% of the workforce worldwide and 55% of the workforce in France

20 hours of training per employee on average in 2015, including the Ethics and Compliance program

Responsibility to the Environment

Reduce and control our environmental impact to protect the health of people everywhere

8% of the Company's energy consumption comes from renewable sources

CUSTOMER SUPPORT

Please contact the Customer Support team for all Application and Technical Support. Our telephone help desks are open Monday to Friday 08:00 to 12:00 and 13:00 to 16:00 Central European Time (except Swedish Bank Holidays).

Application Support

- To help with all of your enquiries we have a team of in-house or field Application Specialist
- If our team can deal with your enquiry over the telephone they will endeavour to do so
- If this is not possible or you require more hands-on help with an evaluation, validation or training then your enquiry will be escalated to our field Application Specialists who may then arrange to visit your laboratory

Technical Support

- Our field Service engineers install equipment, perform preventative maintenance (servicing) and provide emergency breakdown cover in your laboratory
- The service team perform instrument pre-delivery inspections, repairs and airideal® air flow calibration

TRAINING AND EDUCATION

Get ready for tomorrow with new knowledge and skills

To keep you on the cutting edge and better respond to your needs, bioMérieux is continually updating its Training and Education programme.

As laboratories evolve to meet the changing needs of our Healthcare Service, so too must bioMérieux evolve to meet the needs of modern laboratories. bioMérieux offers a range of training courses that will enable you to:

- Increase staff expertise leading to improved performance and efficiency at the workbench
- Contribute to quality and compliance programmes
- Boost and maintain staff motivation and commitment
- Reinforce your lab's brand image

Trainees are issued with training certificates.

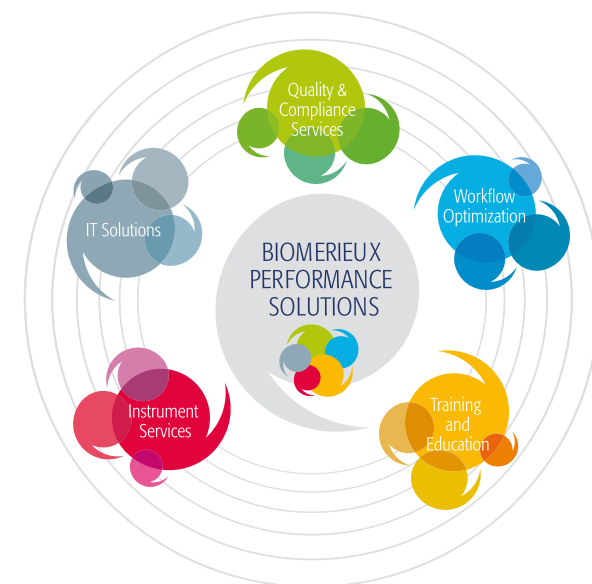

Courses are available now for lab technicians and microbiologists.

The training and education offer propose:

- Metrology training courses
- Scientific training courses
- bioMérieux products training courses

Training center

For more information on our training courses, please contact: customersupport.nordic@biomerieux.com

ABOUT bioMérieux

bioMérieux provides diagnostic solutions (reagents, instruments, software) that determine sources of disease and contamination to improve patient health and ensure consumer safety.

bioMérieux, a world leader in *in vitro* diagnostics

- Consolidated sales of €1.965 billion in 2015
- Over 9,400 full-time-equivalent employees
- An installed base of some 84,500 instruments

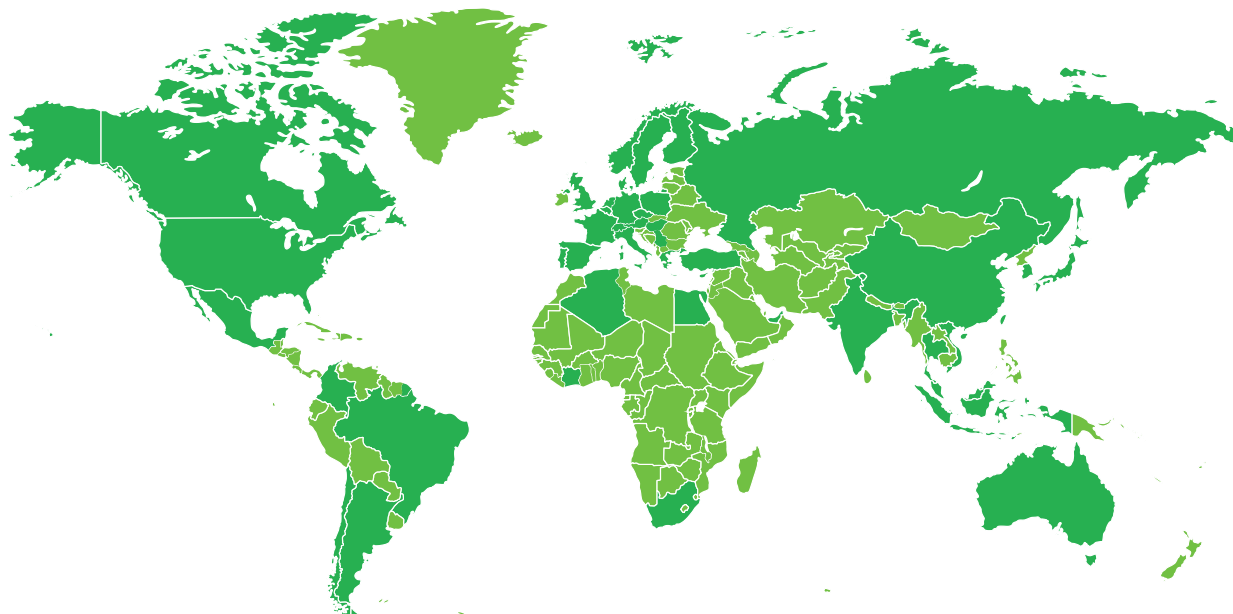

bioMérieux designs, develops, produces and markets diagnostic systems (reagents, instruments and software) for medical or industrial applications.

A worldwide presence in more than 150 countries

- 90% of 2015 consolidated sales from outside France
- 42 subsidiaries
- 21 production sites
- 22 R&D sites

Two business areas

- *Clinical diagnostics (82% of 2015 sales)*
From biological fluids (blood, saliva, urine, etc.), this line of business focuses on diagnosing infectious diseases, such as hepatitis B, HiV, tuberculosis, respiratory infections and pathologies such as cardio-vascular diseases and cancers.
- *Industrial microbiology (18% of 2015 sales)*
This business focuses on providing solutions for the enumeration of microbial flora, detection of specific pathogenic bacteria, monitoring of air and surface quality and sterility testing for the agri-food, cosmetic and pharmaceutical industries.

Quality Policy

At bioMérieux, we never forget that every day, somewhere in the world, a clinician makes a decision for a treatment, or a food product is released for consumption, based on the quality of a test we are providing.

Our tests must provide an optimum level of performance because our customers are themselves responsible for the quality of the test results they provide to those who depend on them. This is why we consider quality to be everybody's responsibility.

bioMérieux's Quality Policy guides our internal processes and drives good business outcomes and efficiencies. In line with regulatory requirements, it also draws upon input from the company's sites and subsidiaries worldwide to ensure that the policy is understood and embraced by all employees.

Quality by Design

We have our minds set on doing better every day and when it comes to our Quality Policy, we adopt a holistic approach.

Our goal is quality by design in everything we do: our aim is not to create quality by checking, but quality right from the start by integrating it into every aspect of our work.

We have a [Global Quality Management System](#) to control our processes and manage risk worldwide, certified against Iso 9001. This approach helps assure fulfilment of regulatory requirements. It leads to decreased production cycle times, reduced product and service nonconformities and an optimised supply chain. Products can thus be launched rapidly on the market and processes can be adapted to satisfy the needs of our customers.

Quality is Everybody's Responsibility

Quality is not the job of the Quality Organisation only: it is a shared responsibility by all employees, affecting everybody from R&D and manufacturing to sales and marketing, as well as support functions.

Performance indicators engage all employees in the achievement of quality objectives. Continuous improvement initiatives are in place, and best practices are exchanged among the company's teams worldwide.

It is our responsibility to help customers do their job by understanding their needs and making sure that we meet them. Our Quality Policy is key to achieving this.

QUALITY & ENVIRONMENT

To meet the high expectations of our customers, our Quality Assurance system is designed to ensure the reproducibility of product performance throughout a product's lifecycle. Each new product is validated following stringent performance criteria required by our customers and by regulatory bodies such as the FDA, AFSSAPS and other organisations such as LNE/G-MED, DNV and specified by pharmacopoeias, food accreditation bodies and ISO standards.

Quality Regulations

Our Quality Assurance and Regulatory Affairs Departments must approve all products before release. All development and validation documentation is archived and can be accessed during an audit.

The following are requirements applicable to our bioMérieux entities:

- ISO 9001:2008, Quality management systems - requirements (A recertification to ISO 9001:2015 will happen in August 2018)
- ISO 13485:2003, Medical-Devices - Quality Management Systems - requirements for regulatory purposes
- ISO 14971:2007, application of Risk Management to Medical Devices
- FDA CGM P 21 CFR Part 820 (Current Good Manufacturing Practises) Quality System Regulation
- All our products meet, as applicable, the requirements of:
 - European Medical Device Directive 93/42/EEC
 - European *In Vitro* Diagnostic Directive 98/79/EC
 - US/EP/JP Pharmacopoeia
 - REACH Regulation on Chemicals and their safe use
 - European Packaging and Packaging Waste directive 94/62/EC
 - Waste Electrical and Electronic Equipment Directive 2002/96/EC

Copies of our certificates can be obtained upon request.

Inspections at Our Production Sites & Subsidiaries

- 25–30 customer audits a year
- International health authorities such as the Fda and AFSSAPS
- ISO 9000 family and ISO 17025 audits

Raw Material Management

- Strict selection and control of raw materials to maintain the reproducibility of performance between batches
- Control of the supply chain for raw materials
- Raw materials are blended for each product
- Full traceability from raw material to finished product
- TSE/BSE Status Certification

Culture Media Production

- Plate production in clean rooms with environmental monitoring and controls
- Filling areas are operated to ISO 5 classification
- Special manufacture for customer specified formulations, filling volumes and ISO 5 presentations for plates and bottles

Performance & Shelf-life

- Evaluated for each product according to:
 - EN 13640 stability testing of *in-vitro* diagnostic reagents
 - EN 1322 *in-vitro* Diagnostic Devices - Culture Media for Microbiology – Performance Criteria for Culture Media
- Using validated methods
- Inter-lot and intra-lot variability analysed to prevent any drift in performance (USP 1117)
- Stability testing:
 - In real-time on 3 batches
 - Includes thermal shocks to guarantee shipment and temperature variations will not impact on performance
 - Pharmaceutical culture media – wild and pharmacopoeia strains tested in development
 - Routinely re-evaluated after launch
 - Extends to beyond the expiry given so that **media can be used on the last day of shelf-life** with no impact on performance

Quality Control

- Microbiological and physical criteria for raw materials and final product
- Includes: growth promotion (recovery rates, colony morphology), pH, colour, agar strength
- Pharmaceutical culture media are tested using microbial strains defined by the USP/EP/JP
- > 50% recovery rate compared with a gold standard media
- Unique $\geq 75\%$ recover rate compared with a previously passed batch of the same media for all 3P™ media
- Non-sterile pharmaceutical testing culture media complies with the harmonised chapters of the pharmacopoeias:
 - Microbiological examination of non-sterile products: microbial enumeration tests (EP 2.6.12, USP 61, JP 35.1)
 - Microbiological examination of non sterile products: tests for specified microorganisms (EP 2.6.13, USP 62, JP 35.2)

Material Safety Data Sheets

MSDS provides lab personnel with procedures for handling or working with dangerous products in a safe manner, and include information such as physical data, toxicity, health effects, storage, disposal, protective equipment, and waste-handling procedures.

bioMérieux reagents conform to all European and national regulations applicable to chemical substances that might have an impact on health or environment.

When required, MSDS in Nordic local languages can easily be retrieved from www.mybiomerieux.com and in Norwegian also from www.econline.com.

From 1 June 2015, the Classification, Labelling and Packaging (CLP) regulation is the only legislation to apply to the classification and labelling of both chemical substances and mixtures. CLP requires companies to classify, label and package their hazardous chemicals appropriately before placing them on the market.

bioMérieux Goes Green – environmental Commitments

Five Key Areas

Throughout the world, bioMérieux is going green. On each site, in every subsidiary, a green champion is in charge of ensuring we achieve our environmental goals in the following five areas of focus.

Energy

Reduce our Consumption of Non-Renewable Energy Sources.

Conscious that continued use of non-renewable energy sources will cause greater environmental problems, we want to use energy as responsibly and efficiently as possible. We have implemented an eco-efficient program focused on three major areas: reduce consumption, increase equipment efficiency, experiment with alternative energy sources.

For examples of how we are achieving our goal, [click here](#).

Water

Conserve Water Through Good Management of Resources.

Water is the resource we use the most in our manufacturing processes. To reduce consumption, we favour closed loop circuits and are actively replacing once-through cooling systems.

For examples of how we are achieving our goal, [click here](#).

Paper

Reduce Paper Usage in Processes, Packages and Products.

As we are constantly growing, we are faced with the issue of increased paper consumption. We are meeting this challenge by changing our product packaging and recycling paper.

For examples of how we are achieving our goal, [click here](#).

Waste

Minimise Adverse Impacts on Health and the Environment.

We have been optimising our waste management for a number of years, reducing the weight of landfill waste, recycling and sorting non-hazardous waste. Specialised companies handle hazardous waste.

For examples of how we are achieving our goal, [click here](#).

Emissions

Minimise Adverse Impacts on Health and the Environment.

Global warming due to greenhouse gas emissions is a major problem. Because of the close link between CO₂ emissions and global warming, we are focusing our efforts on high CO₂ emission sources that have a significant impact on the atmosphere.

For examples of how we are achieving our goal, [click here](#).

LEGAL

TERMS & CONDITIONS

1. ORDERS

- 1.1 To avoid errors, each order should specify:
 - product name and reference number
 - the addresses for delivery and invoicing
- 1.2 bioMérieux's acceptance of any order shall be conditional upon credit worthiness of the Buyer. In particular, bioMérieux reserves the right to suspend the order if the situation of the Buyer visibly presents a risk with regards to the recovery of the outstanding debts of bioMérieux, or in case of unavailability of the Product.

Concerning the participation in handling costs and delivery prices:

 - bioMérieux charges an administration fee on each order
 - bioMérieux charges a dangerous goods fee for shipments that include products with UN numbers
 - Express delivery costs, when such deliveries are asked by the customer, are charged to the customer

2. SUBSCRIPTION CONDITIONS

- 2.1 Adjustable subscriptions are available for usual and regular consumer goods.
- 2.2 Notwithstanding the above, subscription shall be required for special products, cells, blood and red cells of animals.
- 2.3 Given the special treatment of these Products, an additional cost per shipment shall be applied.

3. DELIVERIES

- 3.1 Sales of Products shall be made DDP (Delivered Duty Paid, Incoterms 2010 ICC) to the delivery address specified by the customer in the order. The Products will not be delivered to specific departments or rooms inside the building, unless a special agreement has been made with bioMérieux Sales department.
- 3.2 bioMérieux undertakes to provide the Buyer with the Products (instruments, reagents and disposables) indicated on the order accepted by bioMérieux. Products will be delivered and installed as specified in Buyer's purchase order accepted by bioMérieux.
- 3.3 bioMérieux undertakes to deliver goods from stock without delay. In case of temporary unavailability, the customer will receive this information from bioMérieux. The shipment of the outstanding balance of the order shall be done within the frame.

4. PRICES

- 4.1 Prices of Products are quoted net ex-works (Incoterms 2010 ICC).
- 4.2 VAT shall be applicable to all sales for re-export unless evidence of exemption is supplied at the date of the order. Reagents, disposables and accessories prices are invoiced at the price in force at the date of delivery and in accordance to agreed prices with bioMérieux Sales department.
- 4.3 Unless otherwise expressly agreed by the Parties, all shipment costs and expenses are prepaid by bioMérieux and re-invoiced to the Buyer, even for partial shipments
- 4.4 All prices are subject to change.

5. INVOICING

- 5.1 Products are invoiced on the shipping date, at the price in force at the date of order. Unless otherwise informed by the Buyer, bioMérieux reserves its right to establish a deferred invoicing of the Products.
- 5.2 Delay by the Buyer in challenging the invoiced amount within a period of 30 days from the date of the invoice shall be deemed acceptance thereof by the Buyer.

6. PAYMENT

- 6.1 Payment shall be made 30 days net following the invoicing date.
- 6.2 A penalty is due by Buyer in case of late payment and is to be calculated from the day following the date of payment stated on the invoice. The amount of such penalty is calculated at the interest rate applied by the European Central Bank at its most recent refinancing operation with an eight (8%) point increase.
- 6.3 Failure by the Buyer to fulfil its payment obligations, bioMérieux reserves the right:
 - to remove immediately all the payment facilities and special commercial conditions previously granted
 - to suspend or cancel, without notice and compensation, any current order
 - to require, in order to perform any subsequent delivery, cash payment before each shipment, or any other means of payment chosen by bioMérieux to require immediate payment of the entire outstanding balance
- 6.4 Payment should be made by bank transfer to the bank account indicated on the invoice.

TERMS & CONDITIONS

7. LEASE PURCHASE

In case of lease purchase, the funding agency shall assume the rights and obligations hereunder as Buyer, and shall guarantee the rights and obligations of the end-user.

8. OWNERSHIP RIGHTS AND PASSING OF RISK

- 8.1 All products remain bioMérieux's property until full payment thereof by Buyer. In the event of non-payment by Buyer, bioMérieux reserves the right to recover or to make recover possession of the unpaid goods. bioMérieux shall retain the part of the price already paid as a compensation for the use of the goods. The promise to pay shall not be considered, for the purposes of this provision, as payment.
- 8.2 Notwithstanding the above, the Buyer is liable for all damage occurring to the Products or damage caused by the Products. In accordance with the Incoterms as per Article 3, risk of loss or damage are transferred from bioMérieux to the Buyer after delivery of such Products to the Buyer. The Buyer shall therefore ensure that its insurance covers the Products delivered from this time.

9. TRACEABILITY

The technical specificities of products sold by bioMérieux require compliance with traceability rules. Consequently, bioMérieux reserves the right to sell its Products solely to professionals authorized to provide biological analysis results. The Buyer undertakes to comply with all traceability rules which apply to the Products ordered. bioMérieux will not be liable for non-compliance with traceability rules after delivery of its products to the site specified by Buyer.

10. CLAIMS

- 10.1 The Buyer shall have checked the incoming parcel and within three (3) days from the delivery report to the bioMérieux order department any missing or damaged products.
- 10.2 The Buyer shall check the incoming parcel directly on arrival and if any damage is visible from outside it must be written down on the delivery note at arrival.
- 10.3 Claims must be sent to bioMérieux Customer service as soon as possible upon notice. No product returns shall be accepted without bioMérieux's prior written consent. bioMérieux shall decide, at its sole judgement, if the Products shall be replaced.

11. WARRANTIES

- 11.1 Reagents:
bioMérieux's reagents are intended for in vitro use. The conformance of the reagents to the specifications indicated in the package insert is guaranteed until their expiry date.
- 11.2 Instrument:
bioMérieux warrants the instrument to the Buyer against defects in material and workmanship and defects arising from failure to conform to the user's manual applicable on the date of installation, and as provided to the Buyer, for the period of one (1) year from the date of installation, when the certificate of installation or equivalent is signed.
bioMérieux agrees to correct or have corrected by a third party designated by bioMérieux, either by repair or at its election, by replacement, any such defect found on examination to have occurred, when the instrument has been used under normal operating conditions and maintained in accordance with the instructions provided by bioMérieux such as, but not limited to, written instructions, package insert and user's manuals, during such one (1) year warranty period, provided bioMérieux is promptly notified in writing upon discovery of such defect by the Buyer.
Disposables and replacement items with a normal life expectancy of less than one (1) year such as, but not limited to, batteries, lamps and tubing are excluded from this warranty.
bioMérieux warranty is valid to the Buyer's original site of installation only. Any transshipment VOIDS this warranty unless bioMérieux facilitates the relocation of the instrument.
- 11.3 Software:
bioMérieux warrants that the Software (other than the one embedded in the Instrument) will be in accordance with the descriptions and specifications in the documentation accompanying such software for a period of ninety (90) days from the date of installation under normal use and conditions. During this warranty period, bioMérieux agrees to provide technical support of the Software by correcting any deficiency of the Software and, in no case, by redesigning the Software.
Software developed by and the property of third parties is warranted to be in accordance with the descriptions and specifications in the documentation accompanying such software by bioMérieux and by its software publishers.
Any other warranty, such as covering performance or results linked with their use, or such as warranty for compatibility with the Buyer's hardware, is expressly excluded.

11. WARRANTIES (CONTINUED):

11.3 Software (Continued):

bioMérieux will evaluate warranty claims upon receipt of written notification. Firstly, bioMérieux will make a remote diagnosis and if possible, will correct the defect. Secondly, if needed, onsite evaluations will be initiated. Thirdly, if repair cannot be made on the Buyer's site, the instrument shall be repaired in bioMérieux premises. Transportation costs will be at bioMérieux's expense. The return of the instrument to bioMérieux can only be done after bioMérieux's written approval.

The Buyer will provide access to bioMérieux, in a timely manner, to any technical support, facilities, hardware, software or information in the Buyer's possession necessary for bioMérieux to complete such work. bioMérieux will correct such stated defects.

In any event, the Buyer is under an obligation to insure that the Instrument and/or Software is maintained in accordance with the instructions provided by bioMérieux such as, but not limited to, written instructions, package insert and user's manuals and in accordance with local standards during the warranty period of the concerned Products.

Preventive maintenance is not included in the warranty but rather a part of the imposed maintenance associated with the obligations of the Buyer.

Notwithstanding the foregoing, this warranty will not apply to the extent the Instrument and/or Software does not conform to and/or function in accordance with the applicable written technical documentation as a result of a defect arising from:

- any act or omission of the Buyer
- any corporation, joint stock company or any other entity or organization of any kind (other than bioMérieux or any person under the express direction of bioMérieux) making any revisions or modifications to the Instrument and or Software after its provision to the Buyer
- the malfunction of any Buyer-supplied or Buyer-authorized third-party software or equipment
- Buyer operation of the Instrument and/or Software other than in accordance with applicable documentation or design, or on hardware not recommended, supplied or approved by bioMérieux
- the occurrence of any Force Majeure event such as, but not limited to, fire, electrical current variation, flood and defect in the installation environment of the Instrument and/or Software

THE WARRANTY OF bioMérieux SET FORTH ABOVE AND THE OBLIGATIONS AND LIABILITIES OF bioMérieux THEREUNDER ARE EXCLUSIVE AND IN LIEU OF ALL OTHER REMEDIES, WARRANTIES, GUARANTEES OR LIABILITIES, EXPRESSED OR IMPLIED, ARISING BY LAW OR OTHERWISE, WITH RESPECT TO ANY PRODUCTS DELIVERED HEREUNDER bioMérieux WARRANTY SHALL ONLY APPLY TO PRODUCTS PURCHASED BY THE BUYER FROM bioMérieux.

This warranty shall not be extended or altered except by a written agreement signed by bioMérieux.

12. LIABILITY

- 12.1 bioMérieux accepts no liability for any damage incurred through misuse or incorrect storage of Products.

As such, Buyer shall ensure the respect of:

- the storage conditions written on the Products packaging or set forth in the package inserts

- 12.2 The Buyer or its representative shall take all measures to ensure that instruments, reagents and software are used in compliance with legal requirements and standards, including the installation of instruments and performance analysis. As an expert/a man skilled in the art, the Buyer shall use the instruments in strict compliance with the recommendations of bioMérieux and shall remain liable for any interpretation and any use of results provided. The Buyer guarantees bioMérieux against any third party action on the consequences of using noncompliant Products.

- 12.3 bioMérieux's liability for any and all losses or damages resulting from any cause whatsoever, including alleged negligence, shall in no event exceed the purchase price of the Product in respect of which the claim is made, or at the election of bioMérieux the repair or replacement of such Product plus associated freight charges. For the avoidance of doubt, bioMérieux's warranty expressly excludes any possible labour and transport costs involved in the repair of an instrument. IN NO EVENT SHALL bioMérieux BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES WHETHER BUYER'S CLAIM IS IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY) OR OTHERWISE.

13. WASTE MATERIAL

Unless anything to the contrary whether expressly agreed by bioMérieux or due to a mandatory local rule, the Buyer is responsible for notifying bioMérieux so that the collection, treatment, recovery and environmental sound disposal for the Waste Electrical and Electronic Equipment can be organised, as provided for WEEE directive (2002/96/EC) and any local implementations thereof in the country in which the bioMérieux selling company is located.

The obligations of the Buyer (in particular in connection with decontamination) to which the Buyer will necessarily have to conform, are defined in the user's manual of the concerned system. The conditions of disposal of these systems, as well as the price rates related to these services will be communicated to the Buyer at his request. The Buyer as keeper of the equipment will be responsible for the integrity of the system and for its disposal at bioMérieux benefit. Every expense incurred or damage undergone caused by the Buyer's negligence and/or any breach of its abovementioned obligations will entitle bioMérieux to a compensation.

The Buyer expressly agrees that in case of resale of any Instrument supplied by bioMérieux and/or transfer of the Instrument in any way, within the framework of a loan or a rent for free or for a fee, or a donation or any other terms, on the national territory or any other territory, then bioMérieux will be released de facto, without any other condition, of its obligations of financing and organization of the elimination of the aforementioned waste material. bioMérieux undertakes to communicate any necessary information about the concerned Instruments. The Buyer will be completely responsible for the good documentary, technical and administrative management. The Buyer will guarantee it towards bioMérieux and will hold bioMérieux harmless for any damaging consequence, expenses, legal actions from third party including involved authorities in case of wrongful execution of this obligation.

14. SOFTWARE

14.1 Software included in the price list is subject to a non exclusive license agreement: software programs can neither be reproduced, modified nor transferred without bioMérieux's agreement.

14.2 Software sold by bioMérieux is free from any known viruses at the date of manufacture. The Buyer shall take all necessary precautions thereafter.

14.3 Moreover, bioMérieux assumes no responsibility for the software compatibility with the hardware of the Buyer.

14.4 On the delivery date, Software supplied by bioMérieux are virus free. bioMérieux interventions are done through tools protected by updated antivirus software. It is the Buyer's responsibility to set up a protection plan for all the data of its information system (computing resources of the Buyer) against future risks.

14.5 The Buyer has to make sure of the compatibility of his computer hardware with those proposed by bioMérieux. bioMérieux cannot be held responsible for any contamination by virus. In addition, bioMérieux reserves the right to invoice complementary services due to contamination existing in the Buyer's computer hardware.

15. PERSONAL DATA PROTECTION

Personal data of the Buyer (in particular its address and telephone details) collected are subject to processing's which have been declared to bioMérieux. The Buyer accepts that its personal data are used exclusively by bioMérieux and other entities of the bioMérieux group, in conformity with the provisions of The European Data Protection Directive (95/46/EC). The Buyer has the right to access, modify and rectify such data. For this purpose, the Buyer can contact its account manager.

Within the framework of warranty operations of the systems sold by bioMérieux or the quality control of these systems, the Buyer grants access to bioMérieux to the patients personal data for a required period of time in order to perform the abovementioned operation. According to the patient confidentiality regulations applicable in the country in which the bioMérieux selling company is located and The European Data Protection Directive above and after reception of the written instruction of the Buyer, bioMérieux undertakes to set up, from the beginning of the operation, appropriate devices and safety procedures, so as to guarantee strictly the safety; the integrity and the confidentiality of the data pertaining to the Buyer.

16. ASSIGNMENT

16.1 The Buyer shall not assign or transfer the agreement or any of its rights and obligations arising hereunder, or any order covered hereunder, to any other party, including to an Affiliate, without prior written consent of bioMérieux.

Any change in the ownership or control of the Buyer shall be deemed an assignment, which requires written consent from bioMérieux.

16.2 The Buyer acknowledges that bioMérieux can transfer the order or be subject to a change of control for the benefit of a third party.

17. APPLICABLE LAW

17.1 These conditions of sales are governed by and construed in accordance with the laws of Sweden, Norway, Denmark and Finland.

17.2 Any dispute shall be settled by the Courts of the country in which the bioMérieux selling company is located, which shall have exclusive jurisdiction, even in case of multiple defendants or claim for contribution from a third party.

OVERVIEW

In support of the bioMérieux Goes Green initiative, we have produced this interactive PDF Product List.

The following notes have been produced with the intention of assisting you to get the best results out of this PDF Product List.

As a progressive company, we consider all feedback valuable. If you have any comments or are having problems, please contact us on the addresses given in these notes, or directly to your account manager.

Nordic website

Please follow us on our nordic website, www.biomerieux-nordic.com for Clinical Diagnostics, Industrial Microbiology, Press Releases, events, activities, new PPM Media catalogue, Products and Product Catalogue, news, trainings and more.

General enquiries: contact.nordic@biomerieux.com

OVERVIEW

LAYOUT & NAVIGATION

FINDING PRODUCTS & PRICES

TABLET COMPUTER READY

LAYOUT & NAVIGATION

To help you navigate this Price List, every page is separated into these three areas:

1. Head Tabs

There are ten Head Tabs across the top of every page.

When the cursor is placed over these Head Tabs, the arrow changes to a hand icon. By clicking the mouse when the hand icon is over the required Head Tab, you navigate to this section, and the selected tab changes to White to confirm your choice. All of the unselected tabs are shown in Orange.

2. Tab Menu

For every Head Tab, there is a specific Tab Menu shown in the left hand pane.

This Tab Menu presents the complete list of contents within the selected Head Tab.

If you select a title within the Tab Menu, you advance to the specified page within the Price List. Further Tab Menu options may then be shown if additional pages are available.

As with Head Tabs, your selection is highlighted to show your current position.

At the bottom of this menu are page numbers, with arrows either side to navigate page by page.

3. Content

The content for the required Head Tab and Tab Menu is shown in the largest portion of the page.

The footer bar contains contact details, and will automatically launch email and our web site.

OVERVIEW

LAYOUT & NAVIGATION

FINDING PRODUCTS & PRICES

TABLET COMPUTER READY

FINDING PRODUCTS & PRICES

There are two ways to locate products within this PDF Price List:

1. Using the Head Tabs & Tab Menus

You can locate a product by selecting the relevant Head Tab and Tab Menu and also by browsing forwards or backwards using navigation controls.

For instance to find Etest[®] products, as with previous years these are located in the 'Identification & Susceptibility' Tab. Click the 'Identification & Susceptibility' Head Tab to select and then click on 'Etest' in the Tab Menu.

2. Using the Adobe Reader Search Tool

You can use the Adobe Reader built in search tool to find products by name or reference.

The search box is usually located in the toolbar above. To open the search box if it is not currently available, choose the 'Edit' menu and then select 'Find' or press:

 +  if you're using a Windows PC

 +  if you're using an Apple Mac

Type the word, words or part of the word you want to search for in to the search box.

The way in which you cycle through each result depends on the software being used. In most software the first result will be highlighted on the page, to advance to the next result click the arrow next to the search box.

This search facility is good for finding product references, as well as every incidence of say, Etest. This makes it the most flexible search tool available within this PDF Price list.

Note, Adobe Reader searches from the page currently viewed through to the last page, then continues the search from the front cover until it reaches the page you began on.

TABLET COMPUTER READY

The bioMérieux PDF Product List has been designed to be compatible with tablet devices.

Most devices should support the interactivity, links and options you enjoy on your laptop or desktop computers.

iPad

To get the best performance, we recommend GoodReader app.

- Simply email the product list to your iPad, then open it in GoodReader, or
- Within iTunes with the iPad connected, click on the iPad device, select apps in the head menu, click on the GoodReader icon in the File Sharing window and drop the product list into the Documents folder.
- For further help on using GoodReader, [click here](#).

BacT/ALERT® 3D Culture System
Polycarbonate Blood Culture Bottles
MYLA™

BLOOD CULTURE

MYCOBACTERIAL CULTURE

BLOOD BANK APPLICATION

BacT/ALERT VIRTUO is incredibly easy to use ensuring all staff can easily place bottles on to the conveyor belt. The instrument will automatically scan bottle barcodes and sample numbers. VIRTUO will also check and alert users in 'real time' if bottles are loaded with an incorrect volume of sample or if they have passed their expiration date.

All routine maintenance on the BacT/ALERT VIRTUO is fully automated with no requirement for any daily, weekly or monthly intervention by staff.

The BacT/ALERT VIRTUO can be connected to bioMérieux's Myla Middleware ensuring that custom designed reports and instrument status can be remotely viewed from any PC on the same network.

- Innovative algorithms reduce time to detection providing faster results
- Automated loading and unloading of bottles reduces hands on time
- Automated barcode reading removes any risk of operator errors
- Real time notification of incorrectly filled and expired bottles ensure clinicians have complete data
- Audit logs provide complete traceability of blood culture workflow

BacT/ALERT® 3D Culture System

Polycarbonate Blood Culture Bottles

MYLA™

BLOOD CULTURE

MYCOBACTERIAL CULTURE

BLOOD BANK APPLICATION

BACT/ALERT® 3D Culture System

BACT/ALERT® 3D

The BacT/ALERT 3D provides proven recovery of a wide range of clinically significant organisms, including bacteria, yeasts and mycobacteria. This single system can be used to culture from blood and all normally sterile body fluids using our extensive range of culture media.

The same system can be used to culture mycobacteria from decontaminated clinical samples using our Mycobacterial Process bottles or blood using the Mycobacteria Blood bottles.

BACT/ALERT 3D System Options

The BacT/ALERT 3D system is available in a number of different modules that can be configured to provide a perfect fit no matter what your workload. Larger systems comprise a Controller module with a touch screen for text free control over the basic functions of the system. This unit can be linked to a maximum of six 240 Incubator modules, which would provide sufficient capacity for an annual workload of 84,000 bottles from a single PC.

For the laboratory requiring extra space saving the BacT/ALERT 3D combination module combines the computer function and touch screen of a controller module with two incubator drawers. A further three incubator modules can be linked to this module. Finally the smallest BacT/ALERT 3D 60 can handle an annual workload of up to 3,500 bottles per annum.

Figure 1:
String Configuration

Figure 2:
Stacked Configuration

Configuration

The incubator modules can be configured in either a stacked or string formation. The string configurations are supplied on purpose built bench carts that have cupboards underneath which are left empty for the department to utilise. This configuration is the most user friendly as all the cells are situated conveniently for the loading and unloading of bottles. The stacked configuration has the smallest footprint of any blood culture system currently available and is ideal where floor space is at a premium.

Simplicity

Routine use of the BacT/ALERT 3D system is accessed through the touch screen on the Controller/Combination Module. The software is intuitive, all tasks are easy to perform and the system is designed to minimise the possibility of users making any mistakes. This ensures that staff can rapidly be trained in day-to-day use.

FEATURE

VIRTUO® – New Generation of BacT/ALERT®
BacT/ALERT® 3D Culture System
Polycarbonate Blood Culture Bottles
MYLA™

BLOOD CULTURE

MYCOBACTERIAL CULTURE

BLOOD BANK APPLICATION

Polycarbonate Blood Culture Bottles

BACT/ALERT®

Our users also benefit from bioMérieux's revolutionary, virtually unbreakable, polycarbonate blood culture bottles.

These offer enhanced safety as glass is removed from the workplace. The bottles are also significantly lighter than glass ensuring that waste disposal costs are minimal. The bottles are also validated for transport through your pneumatic air system without any need for additional padding or transport containers. This greatly reduces the time taken for these important samples to reach the laboratory.

Colorimetric Technology

The BacT/ALERT 3D blood culture system uses the most up to date colorimetric technology. This offers improved time to detection over alternative systems in two ways.

First, they provide visual notification of positive bottles as they arrive in the department. This means that bottles may be sub-cultured before they are loaded onto the system thereby improving the turn around time to your Clinicians.

Also delayed entry bottles will flag positive two hours after loading. There is no need to wait until these positive bottles enter the death phase of the bacterial life cycle before flagging.

Negative Bottle

Positive Bottle

FAN Plus Bottles

The new range of FAN media was launched in 2012. This media incorporates Absorbent Polymeric Beads (APB) in place of the activated charcoal to remove antibiotics and naturally occurring bacterial inhibitors, which may be present in the patient's blood sample.

The key benefits are

- An increase in overall organism recovery
- Improved ability to neutralise a broader spectrum of antimicrobials
- Faster Time to Detection compared to the current bottle types
- Clear, easy to read Gram stains

MYLA™

BLOOD CULTURE

MYCOBACTERIAL CULTURE

BLOOD BANK APPLICATION

MYLA™

MYLA™ | BACT/ALERT®

bioMérieux are proud to introduce you to MYLA, an intelligent microbiology middleware solution that is designed by microbiologists for microbiologists.

MYLA is designed to be accessible from any device linked to the network. This means that it is possible to have blood culture systems sited in satellite hospitals, removing the need to transport bottles between sites and reducing the time taken between blood culture collection and incubation. Staff would be notified to the presence of a positive bottle via a variety of alerting mechanisms. These include standard on screen alerts, optional notification lights, and the ability to send text or e-mail messages.

MYLA would also alert users to any disruptions in the interface or when error codes are generated on an instrument (e.g. a temperature alert due to a drawer not completely closed on a BacT/ALERT instrument).

With the launch of a new version of MYLA software, the functionality with the BacT/ALERT systems was improved. Amongst other features these include a range of workflow indicators:

- Average time between blood culture order and when the bottle is loaded
- Average time to positivity
- Average time between positive detection and bottle unloading for follow up

see [here](#) for more details of MYLA.

Strategic Alliance to achieve lab efficiency

COPAN | WASP™ | WASPLab™

In January 2015, COPAN granted distribution rights for its automated platforms to bioMérieux.

This includes both the WASP (Walk-Away Specimen Processor) and WASPLab solutions, which automate microbiology laboratory tasks and provide digital imaging and analysis.

COPAN are a leading manufacturer of innovative pre-analytic solutions, and have been operating in the lab automation market since 2009. The agreement combines bioMérieux's expertise in biology with COPAN's engineering know-how. It also speeds up deployment of bioMérieux's FMLA Lab Efficiency vision in clinical microbiology labs.

Further collaboration is planned - in particular, the development of innovative clinical microbiology diagnostic solutions.

WASP and WASPLab meet even the most demanding needs of microbiology laboratories; enriching bioMérieux's impressive range of automated solutions, including BacT/ALERT and VIRTUO blood culture systems, as well as VITEK 2 and VITEK MS for bacterial identification and susceptibility testing.

bioMérieux is not selling COPAN instrumentation in the Nordic Countries, please contact your local COPAN distributor for more information on WASP and WASPLab.

Workflow Optimisation

Are you Ready for Tomorrow's Challenges?

An environment of laboratory consolidation and high pressure to contain healthcare expenditure means you need to find ways to deliver more with less resources

bioMérieux, as your partner, can help you look at your lab from a different angle. Together, we will analyse your existing lab structure and design a roadmap to optimise your laboratory workflow and performance.

Our Workflow Optimisation solutions combine continuous improvement management techniques (LEAN Six Sigma, Kaizen, 5S...) to:

- Streamline processes to improve lab efficiency and reduce wast
- Increase productivity to absorb larger workloads with improved time to result
- Reduce costs to help contain lab expenditure or be able to invest in new technology
- Reallocate staff to more added value tasks

The Art of Doing More with Less

Workflow optimisation is a real art. Let us show you the keys to successful streamlining. Make use of our experience in biology, technology, automation, productivity, financial control, resource management... to take your lab to the next level!

Fully Automated Stain Process from Fixation to Drying

The automated gram stainer comes with:

- Improved interface with a new graphical touch screen
- Improved user friendliness through up to 10 storable programs
- Improved traceability through barcode reading of reagents
- Improved maintenance through automated cleaning of the nozzles

Chromogenic Culture Media

CHROMID™

bioMérieux have spent the last 50 years specialising in the field of Microbiology. During this time, we have committed to providing laboratories with integrated solutions from specimen collections to result print-outs.

We offer a complete culture media range, including chromogenic, conventional and specific environmental control media, as well as tubes, bottles, dipslides, transport media, labware and more. All of these conform to current rules and regulations, and meet the strictest quality criteria.

CHROMID™ Culture Media

bioMérieux has acquired solid experience in culture media for laboratories specialising in clinical bacteriology. Our high R&D investment policy ensures culture products remain innovative, offering high levels of performance, such as chromogenic media.

CHROMID is the brand name for bioMérieux's range of chromogenic culture media.

Chromogenic media offer enhanced bacterial identification over traditional culture media through colour differentiation. The intensity and specificity of the colours of CHROMID media make it easy to rapidly identify bacterial colonies.

To respond to the rise in nosocomial infections and the increasing need for multidrug-resistant bacterial screening in hospitals today, bioMérieux has expanded the CHROMID range to include a number of new media. These are designed to prevent the spread of Hospital Acquired Infections (HAI).

Chromogenic Culture Media

CHROMID™

Screening for Multidrug-Resistant Organisms

bioMérieux has responded to the rise in nosocomial infections and the increasing need for multidrug-resistant bacterial screening in hospitals by extending our CHROMID range of media:

- CHROMID CARBA
- CHROMID OXA-48
- CHROMID CARBA SMART
- CHROMID ESBL
- CHROMID VRE
- CHROMID MRSA
- CHROMID MRSA/CHROMID S. aureus
- CHROMID MRSA SMART
- CHROMID C. difficile and Clostridium difficile agar

Carbapenemase producing *enterobacteriaceae* (CPE) are particularly resistant bacteria that are capable of causing nosocomial infections and hospital epidemics. The detection of CPE carriers has been highlighted by the World Health Organisation and the Health Protection Agency in order to prevent the spread of these strains and to provide epidemiological data. The use of CHROMID CARBA and CHROMID OXA-48 contribute to the active surveillance of these key resistance mechanisms.

Our chromogenic culture media plates are fully compatible with the VITEK MS MALDI-TOF system.

CHROMOGENIC CULTURE MEDIA

Screening for Multidrug-Resistant Organisms

CHROMID™ CARBA

CHROMID CARBA is a selective chromogenic medium for the screening of carbapenemase producing *enterobacteriaceae* in the patients who are chronic carriers or in patients at risk.

CHROMID CARBA agar consists of a nutrient base combining different peptones, three chromogenic substrates which enable the detection of activities of specific metabolic enzymes for *E. coli*, the KESC group consisting of *Klebsiella*, *Enterobacter*, *Serratia* and *Citrobacter*, and finally *Proteae* in 18-24 hours of incubation. A proprietary mixture of antibiotics favouring the selective growth of carbapenemase producing *enterobacteriaceae*. The media has been shown to have a sensitivity of 97% and a specificity of 99%.

CHROMOGENIC CULTURE MEDIA

Screening for Multidrug-Resistant Organisms

CHROMID™ OXA-48

Organisms carrying the OXA-48 type CPE tend to produce a weaker carbapenemase which may not be detected by the CHROMID CARBA media. CHROMID OXA-48 media is specifically designed to detect the OXA-48 producing *enterobacteriaceae* in 18–24 hours of incubation. This media has exceptionally high sensitivity.

CHROMOGENIC CULTURE MEDIA

Screening for Multidrug-Resistant Organisms

CHROMID™ ESBL

For the Screening of Extended-Spectrum β Lactamase Producing *Enterobacteriaceae*

Microbial resistance through ESBL production was first reported in the early 1980s in Europe and subsequently in the US soon after the introduction of the third generation cephalosporins in clinical practice. Today this resistance mechanism has emerged globally and ESBL producing *enterobacteriaceae* are recognised worldwide as nosocomial infections of major importance.

This media consists of a rich nutrient base with a mixture of antibiotics including Cefpodoxime. Two chromogenic substrates and one natural substrate enable the direct identification of the most frequently encountered ESBL producing *enterobacteriaceae* after 18 hours incubation.

This media is extremely easy to read and allows immediate identification of mixed cultures.

E. coli are identified with pink to burgundy colouration due to β -glucuronidase production.

Klebsiella, *Enterobacter*, *Serratia* and *Citrobacter* (KESC group) appear as green, brownish-green and blue colonies due to β -glucosidase production.

Proteus, *Providencia* and *Morganella* (the Proteae) appear as dark brown to light brown organisms due to deaminase expressing strains.

CHROMOGENIC CULTURE MEDIA

Screening for Multidrug-Resistant Organisms

CHROMID™ VRE

For the Screening of *E. faecium* and *E. faecalis* Showing Acquired Vancomycin Resistance (VRE)

chromID VRE contains two chromogenic substrates (α -glucosidase and β -galactosidase) and Vancomycin (8mg/l) which enable direct identification of *E. faecium* and *E. faecalis* after 24 hour incubation, and specific and selective isolation and detection of acquired ancomycin Resistant enterococci (Van A, Van B).

E. faecium appear as a violet colour, whilst *E. faecalis* appear as a bluish-green colour.

The selective mixture inhibits enterococci with natural resistance (ie. *E. casseliflavus* and *E. gallinarum*) and most Gram Negative and Gram Positive bacteria as well as yeasts.

CHROMID™ MRSA

For the Direct Screening of Methicillin-Resistant *S. aureus* (MRSA)

chromID MRSA is dedicated to the surveillance culture or screening of MRSA to identify hospitalised patients requiring isolation. The screening of MRSA carriers with surveillance cultures is a key step in the fight against nosocomial infections. chromID MRSA has been developed to answer this major health concern.

Identification of MRSA strains is based on the spontaneous green colouration of α -glucosidase producing colonies and the presence of a mixture of antibiotic in 18-24 hours of incubation.

CHROMID™ C. difficile and Clostridium difficile agar

Direct Identification of *C. difficile*

chromID C. difficile agar is a selective chromogenic medium for the detection and identification of *Clostridium difficile* in stools of symptomatic patients.

The medium contributes to the diagnosis and epidemiological monitoring of *Clostridium difficile* infections.

Clostridium difficile is a causative agent of pseudomembranous colitis and more generally of nosocomial or antibiotic-associated diarrhoea.

chromID C. difficile agar consists of a rich nutritive base combining different peptones, taurocholate which favours the germination of spores and a chromogenic substrate (patented) which enable the detection of specific metabolic enzymes for *Clostridium difficile*, and a mixture of antibiotics for the inhibition of most gram positive and gram negative bacteria, yeasts and moulds after 24 hour incubation.

Studies have been shown that alcohol shock pre-treatment is not required.

3P® Culture Media with LockSure® Technology for Secure Environmental Monitoring Sampling

Novel, patented design for a lockable 90mm culture media plate, a standard feature of the 3P Environmental Monitoring media range.

- Plates in the unlocked position on receipt for ease of sampling
- Simple twist after sampling locks the lid
- Simple reverse twist unlocks it for reading or isolation of colonies

Locksure

LockSure provides additional assurance during the critical post-monitoring and transport stages.

- All the benefits of using 3P media
- Locked plates bring additional assurance
 - Reduce the risk of contamination post sampling
 - Reduce the occurrence of false positive results
 - Reduce deviations
 - Improve environmental monitoring trending
 - Contribute to the integrity of results

Sabouraud Dextrose 3P + Neutralizers Irradiated

Count-Tact and 90mm plates have orange coloured agar.

- Differentiation with TSA plates
- Improved discrimination of colonies

TSA 3P

SDA 3P + neutralizers

Pharmaceutical Applications

3P® Irradiated Media

- Performance proven under real conditions using compendial strains and real Clean Room isolates
- Can be used in the clean room and gassing isolator
- Flexible storage temperature: room temperature or refrigeration (2-25 °C)
- Extended shelf-life
- Media can be used on the last day of shelf-life
- QC - pharmacopoeia compliant > 50% compared with controls
- QC - bioMérieux compliant > 75% compared with a previously accepted batch of the same reference
- For secure environmental monitoring sampling:
 - LockSure technology for 90mm plate
 - Count-Tact FIX system for Contact Plates

Electron Microscope Photograph of Traditional Fibre Wound Swab

Traditional fibre wound swabs create a matrix-like environment in which microorganisms are trapped, reducing recovery rates.

Electron Microscope Photograph of the Nylon Flocked QUANTISWAB

QUANTISWAB flocked with nylon microfibres has exceptional hydraulic capillary properties. superior performance in recovery rates and release capacity compared with traditional swabs. now with transport medium and tube.

[Click play](#) to view a video demonstrating the ways in which QUANTISWAB can fit in with your sampling workflow (viewing time 1:30).

VIDAS Consumables & Accessories

VIDAS Reagents for Clinical Specimens

Simplicity, Flexibility & Accuracy

As a health care provider, you face new challenges every day. VIDAS® is constantly adapting to help you overcome them by providing simplicity, flexibility and accuracy.

The VIDAS and mini VIDAS® systems are the most widely used immunoassay systems ever produced with close to 35,000 instruments in routine use.

VIDAS reagent kits include all reagents in a single-dose and ready-to-use format together with separate standards and controls, making it easy and cost-effective to run one or several patient samples at a time. All kits can be run on any of the VIDAS family.

VIDAS 3

Retaining all the highly valued features of the VIDAS and mini VIDAS systems, VIDAS 3 adds greater automation, traceability and control through the addition of a rack-based, primary sample tube handling system, as well as barcoded detection and identification of SPRs, strips and sample tubes.

A touch screen allows easy interaction with the system, and bi-directional interface capability is now standard.

Using four analytical modules with three positions each, greater flexibility is achieved in processing different assays simultaneously. Racks are readily integrated into automated sample handling systems, improving workflow.

FILMARRAY®

FILMARRAY®

The FilmArray® system is an FDA-cleared and CE-marked multiplex PCR that integrates sample preparation, amplification, detection and analysis all into one system.

The FilmArray® is a syndromic approach to diagnose infectious disease with a fast molecular diagnostic assay.

- Simple: 2 minutes of hands-on time
- Easy: No precise measuring or pipetting required
- Fast: Turnaround time of from 45 min to about 1 hour
- Comprehensive: Large infectious disease panels

The FilmArray now has four FDA-cleared and CE-marked panels:

- Respiratory Panels
- Blood Culture Identification Panel
- Gastrointestinal Panel
- Meningitis/Encephalitis Panel

ARGENE®

FILMARRAY® - How Does it Work?

FilmArray®

The FilmArray® pouch stores all the necessary reagents for sample preparation, reverse transcription-PCR, PCR, and detection in a freeze-dried format.

Prior to a run, the user injects hydration solution and sample combined with sample buffer mix into the pouch.

The FilmArray® takes care of the rest.

First, the FILMARRAY® extracts and purifies all nucleic acids from the sample. Next, the FILMARRAY® performs a nested multiplex PCR. During the first stage PCR, the system performs a single, large volume, multiplexed reaction. Finally, individual, singleplex second-stage PCR reactions detect the products from the first-stage PCR.

FilmArray® Software

The Filmarray® software walks you through the entire process. When the run is complete, the software analyses and reports results in a simple, easy-to-read format. Using endpoint melting curve data, the FilmArray® software automatically generates a result for each target.

[Click play](#) to view a video of the FilmArray® in action (viewing time 4:51).

Why use FilmArray®?

ARGENE®

FILMARRAY® Panels

The FilmArray® is an easy-to-use multiplex PCR system with a variety of diagnostic applications. The FDA-cleared and CE-marked Gastrointestinal (GI) Panel, Blood Culture Identification (BCID) Panel, Respiratory (RP) Panels and Meningitis/Encephalitis (ME) panel are lab-ready today. The Pneumonia Panel is in development.

The GI, RP, BCID and ME panels are comprehensive and test for viruses, bacterial, yeast, parasites and antimicrobial resistance genes.

Whether you are trying to select appropriate therapy for a septic patient, or determine exactly which respiratory pathogen is making a young child sick, the FilmArray can return answers fast.

FILMARRAY®

FilmArray® Panels

Respiratory Panels

The FilmArray® RP tests for a comprehensive set of 20 respiratory viral and bacterial pathogens in about an hour. It identifies the most common viral and bacterial pathogens that cause respiratory tract infections that present with nearly indistinguishable symptoms. The FilmArray® RP2*plus* is faster, more accurate, and more comprehensive than ever. An unprecedented run time of about 45 minutes enables higher efficiency and throughput on the FilmArray® 2.0 and the FilmArray® Torch Systems.

The FilmArray® Respiratory Panels (RP and RP2*plus*) test for a comprehensive panel of 20/22 respiratory viruses and bacteria (Sample Volume: 300 µL).

Viral		Bacterial	
Adenovirus	Influenza A	<i>Bordetella parapertussis</i> *	
Coronavirus HKU1	Influenza A/H1	<i>Bordetella pertussis</i>	
Coronavirus NL 63	Influenza A/H3	<i>Chlamydomphila pneumoniae</i>

FilmArray® Panels

Blood Culture Identification Panel

The FilmArray® BCID Panel tests for a comprehensive set of 24 gram-positive, gram-negative and yeast pathogens and three antibiotic resistance genes associated with bloodstream infections. It detects and identifies the most common causes of bloodstream infections.

Gram-positive bacteria	Gram-negative bacteria	Yeast	Antibiotic resistance
<i>Enterococcus</i>	<i>Acinetobacter baumannii</i>	<i>Candida albicans</i>	<i>mecA</i> - methicillin resistance
<i>Listeria monocytogenes</i>	<i>Haemophilus influenzae</i>	<i>Candida glabrata</i>	<i>vanA/B</i> - vancomycin resistance
<i>Staphylococcus</i> <i>Staphylococcus aureus</i>	<i>Neisseria meningitidis</i>	<i>Candida krusei</i>	KPC - carbapenem resistance
	<i>Pseudomonas aeruginosa</i>	<i>Candida parapsilosis</i>	
<i>Streptococcus</i> <i>Streptococcus agalactiae</i> <i>Streptococcus pneumoniae</i> <i>Streptococcus pyogenes</i>	<i>Enterobacteriaceae</i> <i>Enterobacter cloacae</i> complex <i>Escherichia coli</i> <i>Klebsiella oxytoca</i> <i>Klebsiella pneumoniae</i> <i>Proteus</i> <i>Serratia marcescens</i>	<i>Candida tropicalis</i>

FilmArray® Panels

Meningitis/Encephalitis Panel

The FilmArray® ME Panel tests for a comprehensive set of 14 bacteria, viruses and yeast. It identifies the most common viral, bacteria, and yeast pathogens that cause infections in the central nervous system which, in some cases, can be life-threatening.

Bacteria	Viruses	Fungus
<i>Escherichia coli</i>	Cytomegalovirus (CMV)	<i>Cryptococcus neoformans/gattii</i>
<i>Haemophilus influenzae</i>	Enterovirus	
<i>Listeria monocytogenes</i>	Herpes simplex virus 1 (HSV-1)	
<i>Neisseria Meningitidis</i>	Herpes simplex virus 2 (HSV-2)	
<i>Streptococcus agalactiae</i>	Human herpesvirus 6 (HHV-6)	
<i>Streptococcus pneumoniae</i>	Parechovirus	
	Varicella-zoster virus (VZV)	

The FilmArray® Meningitis/Encephalitis Panel sample type: 200 µL of uncentrifuged cerebrospinal fluid (CSF).

Labguard® 3D Accessories

In today's increasingly competitive environment, demands for cost containment, whilst dealing with increasing workloads means your laboratory and services are faced with having to:

- Optimise laboratory processes and provide faster results
- Improve quality whilst ensuring regulatory compliance
- Motivate personnel and maintain or increase skills and competencies

To help you meet these challenges, bioMérieux have developed a range of Performance Solutions™ that increase laboratory performance on every level and give you that competitive edge. Labguard® 3D is designed as a comprehensive environmental program adapted to your departments' specific needs

This solution favourably satisfies the constraints of laboratory accreditation according to the standards EN 15189 and EN 17025.

Labguard 3D consists of a range of software and hardware entirely developed by AES / bioMérieux suited to your specific customer requirements.

For more information on Labguard 3D, [click here](#).

Labguard® 3D Accessories

Labguard® 3D Software Features

The Labguard 3D software for temperature monitoring can be provided in 3 versions adapted to the needs of the department; **Welcome, Executive and Integral.**

Additional optional modules may also be proposed:

- Group and user management software** – This option allows the creation and management of groups at the heart of the software (groups of users, groups of system supervisors, service groups in an organisation). Each group can be allocated its own functions (specific alarm transfer, rights of access...). Each user can also manage the login and password which secures access.
- Alarm notification by widget** – This option allows users on the IT posts in the department to be alerted to alarm situations; The user is then informed of the alert by a change in the colour of the representation of the channel, and also by the appearance of a widget (pop up) if the Labguard 3D software is not switched on. Within this option, the alarm notification can be transferred to all types of external media (telephone message, email, SMS, fax, siren, light pole).
- Full web-based installation** – This option allows the laboratory to carry out its own provision of sound fitting (and calibration) and equipment qualification (cartography) respecting the current standards (NF X 15140).
- Notification via email** – This option allows the laboratory to carry out its own provision of sound fitting (and calibration) and equipment qualification (cartography) respecting the current standards (NF X 15140).

Labguard® 3D Transmitters

Transmitters

The Transmitters: Labguard 3D 2 transmitters can emit and receive radio information. The functioning of the radio emitters can be modulated according to a method of **Data Logging** (programmed emission of information) or according to **Real Time** mode (continuous emission). In both cases, the alarms are transmitted in real time. These 2 modes allow the response to **different levels of criticality in the equipments monitored**.

These transmitters can be connected to 1 or 2 probes simultaneously. The radio frequency used for these transmitters strictly follows current legislation. No risk of interference with other equipment should be feared by the department.

The Receivers: Labguard 3D proposes a range of receivers adapted to the needs of the laboratory. Receiver RD232 for the reception of information on a single IT post. Receiver IP for a transmission of information on the Ethernet network of the laboratory.

The Transport solution: The Labguard 3D range offers several transport solutions to follow your samples. These recording devices are compatible with the software Labguard 3D and its module of management of "picking monitoring".

- **Autonomous Recording Devices** - The Tomkey system allows, on its screen, the permanent reading of the conditions of transport and the possible overrunning of the defined thresholds. The Tomprobe system, ultra compact, can also successfully record temperature and humidity conditions during transportation. These recording devices are autonomous, delivered calibrated and can be re-calibrated.
- **The Communicating Autonomous Recording Devices** - These recording devices can transmit by radio the information related to the transport period from the arrival of the samples in the laboratory.
